Hubbell Premise Wiring aluminum service poles are the answer to the problem of dropping cables from a ceiling plenum to workstations below. They have the capacity to house power, data and fiber cables. There is room to meet Category 5e and 6 bend radius requirements and they are fast and easy to install. Three lengths are available and a trim plate and mounting screws are included with the pole.

**APPLICATIONS**

- Service poles are used in retail areas for lighting, checkout and credit card machines and workstations.
- Open office work stations that are often moved or rearranged
- Single story, slab on grade areas
